

William Tristão de Paula

Cotia, São Paulo, Brazil
+55 11 97453-1345
williamtristao@hotmail.com

High skilled Mobile Developer with over 7 years of experience, specializing in iOS and tvOS development. In addition to my expertise, I have a strong background in cross-platform mobile development and web development.

Throughout my career, I have been responsible for the release and maintenance of several apps with over 1 million installations. My most significant project was developing and launching a streaming app for Apple TV for a major international telecommunications company.

EXPERIENCES

Agile TV — Mobile Developer

2021 - Present

Worked on multiple projects using mainly Swift to iOS and tvOS, all of them are streaming (video and audio). During this period, I have been supporting teams with my knowledge of React and React Native in projects that involve web, mobile and SmartTVs (Tizen and WebOS) apps. My role has often extended to team leadership, guiding key projects to completion. Some of the main projects are:

- **Claro TV+**: The main streaming app of a major broadcasting company, built with MVVM-C for iOS/tvOS.
- **PUC-Campinas Play**: A streaming app of one of the biggest universities in Brazil. Developed with MVC for Android/iOS/Web.
- **Prism**: A white-label streaming app, using MVVM architecture.

Wiplay — Mobile Developer

2018 - 2021

Worked as principal mobile developer using cross-platform technologies as React Native and Flutter to communication and social media apps.

Successfully developed mobile apps for existing projects lacking a mobile presence, and created new apps from scratch for innovative projects. The main projects are:

- **AppTalk**: The main app launched by the company, designed as a social media platform for employees and employers within the same organization to communicate and interact seamlessly.
- **Wiplay**: A Digital Signage and Menu Board app for Android TV.

EDUCATION

Bachelor of Information Technology - 2020 - 2023

Virtual University of the State of São Paulo, São Paulo, Brazil

Technical Course in System Development - 2016 - 2018

SENAI, São Paulo, Brazil
